Mathematics/Western Governors University

**I love SJE** because it gives me the opportunity to teach what I am passionate about in a supportive and caring environment. As a math teacher, I am frequently asked, “When am I ever going to use this?” As we practice doing math, we are training our minds to recognize patterns, problem solve, and think critically. These skills are useful in many areas of life! It is my goal as a teacher to act as a guide as students engage in the process of learning and discovery.
