I love SJE... because I am able to integrate my faith into my teaching. I love that I can talk about God and pray in my classroom and school. I love working with this group of teachers and staff because they provide necessary support and encouragement.

We go above and beyond... by providing support and enrichment to all of our students. If student needs exist, teachers and staff investigate ways to provide successful learning experiences.

Learning is Fun... in second grade as we work for complete understanding of a subject. We integrate subject areas as we work on a solid base for learning. We incorporate interesting projects, while including technology in our tactile learning.
