**I love SJE...** because of the inclusive environment at the school and community. As I began my experience at SJE school, staff members, teachers, and community members weren't hesitant to reach out and welcome me to SJE as well as offer their assistance. I love that I can incorporate faith into the students' lives, inside and outside the classroom, through my teachings.

**We go above and beyond...** SJE goes above and beyond to ensure every student has the necessary materials to be successful in the classroom by including differentiated instruction. This approach allows students to be successful and shine! I want to make sure every student feels included and is eager to learn in this environment.

**Learning is fun...** because it empowers students. When empowered, students gain confidence which leads to success and accomplishment. This brings a sense of joy to the student and increases their desire to continue to learn.
